

OLIVER TILLINGHAST

Wichita, KS | (785) 214-8759 | obtill199@gmail.com

Active TS/SCI with CI Polygraph | U.S. Citizen | Open to remote work, OCONUS rotations, and 50-75% travel

INTELLIGENCE ANALYST | AI INTEGRATION & TEST | TRAINING | PROGRAM COORDINATION

PROFESSIONAL SUMMARY

Intelligence professional with six years supporting U.S. Government, military, and Intelligence Community missions in classified environments. Team lead for 20+ analysts, project manager for a large language model rollout, AI/ML test and evaluation lead, trainer of approximately 100 personnel, and self-taught developer. Works where intelligence operations and technology meet: producing time-sensitive intelligence for command leaders, translating analyst needs into technical requirements, testing new tools against real mission workflows, and training the people who use them.

CORE COMPETENCIES

All-Source Intelligence Analysis | Multi-INT Fusion | SIGINT / Digital Network Intelligence (DNI) | Target & Network Development | Time-Sensitive Reporting & RFIs | AI/ML Test & Evaluation | Large Language Model (LLM) Implementation | Requirements & User Stories | Plans of Action & Milestones (POA&M) | Project Management | Training Development & Delivery | Team Leadership & Mentoring | Cross-Agency Coordination | Executive Briefings | Python, SQL, JavaScript | Palantir, Analyst's Notebook, ArcGIS

PROFESSIONAL EXPERIENCE

KANSAS AIR NATIONAL GUARD

McConnell AFB, Wichita, KS

Fusion Analyst / Data Analyst Team Lead, 184th Intelligence Group and 184th ISRG

Oct 2022 - Present

Leadership and program management

- Lead a team of 20+ analysts supporting strategic, operational, and tactical missions: create execution plans, assign work, set expectations, monitor progress, and resolve problems to keep efforts on schedule.
- Build plans of action and milestones (POA&Ms) for test and evaluation, developmental, and capability objectives, tracking tasks, milestones, dependencies, risks, evidence, findings, and recommendations for leadership and external stakeholders.
- Write formal requirements, user stories, test reports, risk documentation, implementation plans, and leadership recommendations; support government, academic, laboratory, and industry partners including MIT, national laboratories, and AFRL.
- Briefed the Director of Intelligence for the Air National Guard on the team's work, operational impact, and contribution to Air Combat Command policy.

AI integration: Scale AI Donovan

- Project-managed the 184th ISRG's implementation of Scale AI's Donovan large language model as primary point of contact between about 30 intelligence professionals and Scale AI; translated analyst needs into requirements and use cases and coordinated integration, testing, training, and rollout.
- Integrated Donovan with ChatSurfer and multiple Intelligence Community databases and tools and built it into established intelligence workflows, helping lay the groundwork for automation, augmentation, and AI/ML teams across Air Combat Command.
- Ran a biweekly and quarterly delivery cadence with Scale AI, using capability demonstrations to gather feedback, identify integration needs, and inform rollout decisions.

AI/ML and software test and evaluation

- Lead classified software and AI/ML evaluations with Scale AI, Sandia National Laboratories, and Pacific Northwest National Laboratory: write plans of execution, test criteria, mission-representative workflows, and data-collection methods.
- Assess output accuracy, operational utility, mission fit, limitations, integration issues, and adoption barriers; carry clear findings to engineers, researchers, and product teams; recommend against fielding tools that lack operational value.
- Tested a Sandia National Laboratories tool designed to identify movement in an order of battle; challenged the model's approach and recommended expanding it to signals-based order-of-battle identification.

Digital Network Intelligence Analyst, 161st Intelligence Squadron, 184th Intelligence Group

Sep 2020 – Oct 2022

- Performed digital network intelligence (DNI) and signals intelligence (SIGINT) analysis, multi-intelligence fusion, and all-source analysis supporting time-sensitive reporting and crisis monitoring.
- Built target, entity, relationship, and timeline structures covering 150+ individuals of interest.
- Created and answered requests for information (RFIs) for intelligence needs.
- Established information-sharing relationships with NSA, CIA, Army, and other Intelligence Community organizations.
- Authored the group's Intelligence Oversight training; mentored 10+ analysts and brought three to full proficiency within one year.

Selected Operational Experience (across both roles)

- Operation ALLIES REFUGE: tracked 52 subjects of interest and authored 109 time-sensitive reports that supported the safe evacuation of 124,000 noncombatants.
- U.S. Central Command: produced 20+ multi-intelligence assessments, integrating geospatial, signals, human-source, and open-source reporting into decision support for command leaders.
- U-2 operations: served as an intelligence report writer supporting high-altitude U-2 missions for about ten months on sustained 10+ hour night shifts.
- Participated in multiple military exercises.

TRAINING AND USER ENABLEMENT

- Created and delivered training for approximately 100 personnel, including initial job certification and required annual recertification, covering intelligence duties, Intelligence Oversight, analytic platforms, and emerging tools under evaluation.
- Trained users on Scale AI Donovan, Palantir, FADE/MIST, IBM i2 Analyst's Notebook, and Esri ArcGIS through hands-on instruction, procedure guides, reference materials, mentorship, and workflow support.

TECHNICAL AND SOFTWARE PROJECTS

- Designed and deployed Node.js, React, and SQLite applications for multi-source collection and monitoring.
- Designed and fielded a natural-language retrieval workflow that lets combatant-command planners query operational plans in seconds; extended it to support real-time wargaming and course-of-action questions against the plan of record.
- Built quantitative Python models for probabilistic assessment; helped develop an Esri ArcGIS dashboard and historical database documenting order-of-battle movement.
- Work directly with engineers to brainstorm tools and capabilities that address analyst needs across the Intelligence Community; experience with ontologies, containerized capabilities, and DGS-X hardware designed to reduce the effects of disconnected networks.

TECHNICAL SKILLS

Analytic Platforms: Palantir, IBM i2 Analyst's Notebook, Esri ArcGIS, FADE/MIST, ChatSurfer, Cognos, iSpy, CED, MEPED, NASICLINK, NSA discovery and research tools, Intelligence Community databases

AI and Data: Scale AI Donovan (LLM), AI/ML test and evaluation, natural-language retrieval workflows, ontologies, APIs, ETL-style data pipelines, dashboards

Programming: Python, SQL, SQLite, JavaScript, Node.js, React

EDUCATION AND TRAINING

Associate of Applied Science, Intelligence Studies and Technology, Community College of the Air Force	2024
Associate of Science, Neosho County Community College	2019
Marketing and Digital Marketing coursework, Wichita State University	2023 – 2024
NETA Signals Intelligence Course Series, National Security Agency	2021 – 2023
Signals Intelligence Analyst Technical School	2020
Complete Web Development Bootcamp	2023
